UVX

Introducing the newest extension to the Immortal line – CARPRO UVX Nano-ceramic Heat-rejecting Window Film.

Heat-insulating window films are designed to enhance the glass' ability to reject solar energy in the forms of infrared, ultraviolet and visible light. UVX is packed with the newest ceramic nanotech allowing powerful IR heat insulation, blocking up to 99% of UV radiation, and reducing glare. On top of that, UVX comes in 4 levels of Visible Light Transmission (5%, 20%, 35%, 70%) allowing you to fine-tune the aesthetics of your car, as well as your sense of privacy inside.

Additionally, in contrast to metalised films, the nano-ceramic structure does not interfere with radio signal. UVX is not a mechanical protection film, however we've still equipped it with an anti-scratch layer which will prolong its life.

UVX comes in 4 levels of VLT (5%, 20%, 35%, 70%), as 1520mm x 30m rolls and is fully compatible with all Immortal installation accessories.

VERY HIGH TSER (TOTAL SOLAR ENERGY REJECTED)

REDUCES GLARE

99% IR AND UV REJECTION

DOES NOT INTERFERE WITH RADIO SIGNAL

MORE EFFICIENT COOLING

10-YEAR WARRANTY

	UVX ⁵	UVX ²⁰	UVX ³⁵	UVX ⁷⁰
VLT	3%	20%	37%	71%
VL REJECTION	9%	9%	9%	9%
UV REJECTION	100%	99%	99%	99%
IR REJECTION	99%	99%	99%	99%
TSER	83%	78%	72%	62%
GLARE REDUCTION	39%	39%	39%	39%
SCRATCH-RESISTANT LAYER	3H	3H	3H	3H

UVX comes in 4 levels of VLT (visual light transmission) and allows you to fine tune both the aesthetics and performance of the film.

Construction

RELEASE LINER WITH SILICONE COATING

ADHESIVE LAYER WITH UV INHIBITORS

TINTED POLYESTER FILM

ADHESIVE LAYER

NANO-CERAMIC HEAT REJECTION LAYER ON CLEAR PET FILM

SCRATCH-RESISTANT COATING

The technology adopts multilayer sputtering technology to uniformly spray nano-ceramic particles on the base Polyethylene Terephthalate (PET), to reach maximum thermal insulation through heat absorption.

This simply means the car's interior (and you yourself!) will cool down faster and stay cool for much longer, while limiting AC energy usage.
